

Connect for Automotive Success

Europe's leading, fully integrated automotive maritime logistics specialist

➤ CONNECT FOR

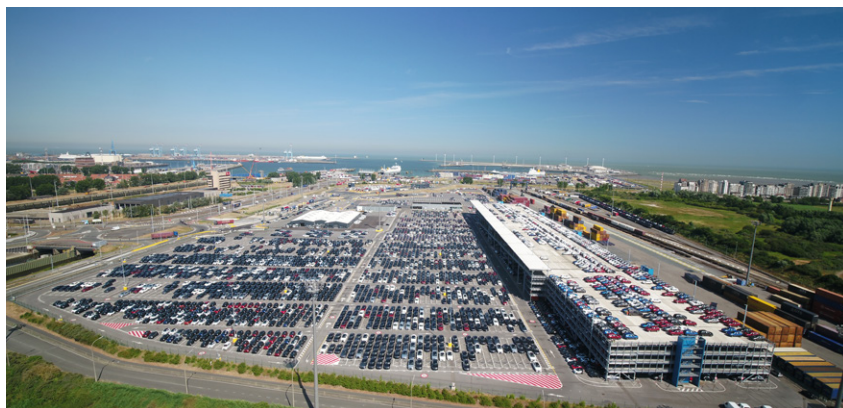

Peace of Mind

Responsible for handling over 1 million vehicles per year, we are one of Europe's leading providers of automotive maritime logistics solutions.

Independent of any deep-sea operator, we own and operate all the assets in our value chain. This, together with our experience and network relationships, enables us to provide a seamless end-to-end service for you and your vehicles.

From port to port, we're with you at every step, providing one point of contact, one quotation, and one final invoice as we ship, store, and prepare your vehicles efficiently, safely, and compliantly ready for onward rail or road connections throughout Europe and the UK.

We're with you at every step, providing one point of contact, one quotation, and one final invoice.

Frequent Reliable Sailings

With 30 purpose-built ships featuring separate automotive decks, over 200 sailings per week, and terminal handling services at 15 ports, we provide reliable, cost-effective connections between Europe's major economic hubs, delivered by an experienced team of over 3000 people.

Our short-sea service also extends the reach of deep-sea carriers, forming a crucial link between major international shipping routes and regional distribution networks. It ensures the efficient movement of vehicles across smaller distances, giving global manufacturers a seamless link to local markets.

So, whether you need to transport five cars or 500, you can trust our ships to do the job.

Giving global manufacturers a seamless link to local markets.

Secure, Flexible Vehicle Storage

We own and operate six ports with secure terminal hubs at strategic coastal locations in the UK, Netherlands, and Belgium. These locations are close to global shipping routes and key European road and rail networks.

Our hubs offer storage space for over 130,000 new vehicles and are the primary entry, storage, and transit points for importing, exporting, and distributing cars across Europe and the UK.

Use our port terminals to hold stock and move it quickly on demand, allowing you to manage your supply chain efficiently, optimise vehicle flows, minimise storage time, and ensure just-in-time delivery to your dealers and customers.

**Our hubs offer storage space for
over 130,000 new vehicles.**

Efficient Onward Transport

Vehicles can be transferred from our port terminals via road, rail, barge or short-sea shipping to your dealer network or customers.

CLdN is a leading provider of integrated quay-to-quay and door-to-door logistics solutions. Founded in 1929, we ensure reliable, cost-effective transport links between the major economic areas of Europe.

With 30 ships and more than 200 sailings a week, CLdN provides shortsea connections between the European continent, the United Kingdom, Ireland, Iberia and Scandinavia and offers the lowest CO₂ footprint of all Western European roll-on / roll-off freight operators.

Our cargo and multimodal services have a Europe-wide reach using our extensive network of ships, terminals and equipment.

CLdN's 3,000 employees ensure that we fulfil our mission: to excel as an integrated provider of maritime links.
